The impact of high-energy astrophysics experiments on cosmological physics

October 27-28, 2008 • Chicago, IL

KAVLI INSTITUTE FOR COSMOLOGICAL PHYSICS • KICP WORKSHOP

Workshop topics :

- Search for dark matter signatures with particle astrophysics experiments
- Information about cosmological populations embedded in the high-energy sky
- Highest energy particles as probes of cosmic backgrounds and new physics
- Gamma rays and ultra-high-energy cosmic rays as probes of the intergalactic magnetic field
